// The Company

Competence based on history

Innovation for the future

Individuality, precision, perfection and efficiency are quality characteristics which cannot be purchased. They have to be earned every day. According to this principle Maplan is developing since 30 years on a constant and consequent base the competence of his staff. Today, 190 people assure on a total production surface of 20.000 m² efficient precision work.

The company's geographic location is in the dynamic country triangle of Berlin-Hamburg-Mecklenburg and is operating globally. Customers all over the globe appreciate the grown manufacturing know-how, the quick deliveries, the uncompromised machining precision as well as the outstanding quality of Maplan products. This is reflected by a long reference list of well known companies.

Maplan is producing machine components for the plastics industry and multitude of other different economic sectors. Best in class infrastructure for high precision machining, long term experience in manufacturing of complex designs, high overall efficiency, lean structure, quick and flexible order processing and a very individual customer service by competent people are the formula for our international success.

Highest quality

Together and not against
each other

// The Speed

Flexibility through efficient structure

Working together with experts

Complex hierarchies create problems – Lean structures provide solutions. Maplan offers you a lean structure, efficient organization assuring the shortest way to the perfect product.

Our team consists of highly skilled specialists and experts, working since years together. Constant investments into our machine park assure to be always at the latest level of technical equipment. Process oriented manufacturing logistics, optimized processes from order entry to delivery of the final part and a policy of “short ways” reduce production throughflow times. More and more customers appreciate our expertise and involve Maplan already in an early conceptual stage as development partner.

From development to delivery of the final part. The most important Maplan product is their advance in time, quality and efficiency.

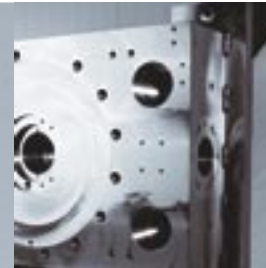

All around service

// All around service

Maplan people with
50 tons of precision !

Block parts manufacturing

Milling, Boring

Max. length 10.000mm x width 3200 mm x height 2500 mm,
max. weight 50.000 kg

Rotations symmetry manufacturing

Vertical: max. dia. 2000mm x length 1500mm,
max. weight 20.000 kg

Horizontal: max. dia. 1000mm x length 10000mm,
max. weight 10.000 kg

Plasticizing screws

Dia. 350mm x length 10000mm, max. weight 10.000 kg

Heat treatment, Stress relieve, Ionitring
max. dia. 500mm x length 10000mm,
max. weight 10.000kg

Rolls

Max. dia. 1000mm x length 8000mm, max. weight 10000kg

Ionitring

Max. dia 500mm x length 10000mm, max. weight 10000kg

a matter of course for Maplan

Everything under one roof unique - worldwide

Manufacturing components in the most efficient and quickest way could be a science. One approach could be to have long meetings to discuss raw materials, manufacturing concepts, leadtimes and unit cost, or - easier and quicker - pick-up the phone and call your Maplan specialists to discuss the issue.

- Your partner Maplan has CNC controlled machines for the production of components and spare parts of each machine and system size.
- Maplan is sitting near the switchboard of a production network with over departmental and cross functional, therefore efficient conception and production.
- Maplan shows new ways for quick and highly efficient problem solving. Everything they produce is subject to a detailed quality control system, responding to all existing norms.

Maplan is on a daily base brainstorming and questioning themselves on how to improve something good towards better. Since three decades! Their success is the result.

Glowing enthusiasm

Listening,
planning,
putting into practice

// The customer

Individual solutions for you

Focus on the customer

A lot is automated, almost everything is subject to a standard. The difference to the competition is made by motivation, customer orientation, on-time reliability, efficient focus and the intention to the total quality. In other words "the factor human being".

Maplan is taking care of not becoming anonymous machinery. For our customers we have a face and a name. Every customer is individually looked after by a responsible expert who personally accompanies the project from start to delivery, as always available responsible contact person.

The result of this is not only a feeling confort, but gives also much more efficiency: Troublefree information flow. Speed of reaction is increased. Every customer's wish is listened to.

Know how out of long term production practice and out of close raw material supplier contacts is resulting into individual, customer specific solutions. For special tasks or operations which are not able to be covered by our own infrastructure, we are able to short term involve competent cooperation partners. All this of course by respecting the shortest delivery dates.

Communication is silver
support ist gold

Test the Best!

Quality

The best support is the one you don't need!

Price is always a discussion topic. Just in time more and more. But why are so many silent when quality is discussed? Let's discuss: About precision which does not only necessitate modern equipment, but also above average qualification of the production team. Rework and scrap rates below 0,5% or in other words 99,5% of all produced parts are free of defects.

And the speed with which failures and defects in per mil region are exchanged by immediate replacement deliveries. Let's discuss about it. Also in this context everything is speaking for Maplan.

Reaction time

Quick help is double help!

Time is money and Maplan saves you time. By a highly efficient throughout organization, short ways, no complex hierarchies and an experienced team. By individual customer contact, no frictional loss. By creative solutions, more efficiency. By 24 hours service. The overall result is more than the sum of these points. It's an important time gain, respective lead.

Customer satisfaction

Solution proposals instead of searching for problems!

Success is a question of measure. What is the measure of success? Turnover? Return of invest? Maplan is measuring it's success primary with the satisfaction of their customers.

Only if you feel perfectly supported, if you have been continuously, from the conceptional stage to delivery, consulted and accompanied, if you notice with satisfaction that perfect quality has been delivered just in time, and further notice that this project couldn't have been put into practice with another partner, briefly: only if you are overall satisfied, than Maplan is it too.
