Facts

Block Parts Manufacturing

When precision quality and speed determine the race

Maplan is prepared for your order. Existing capacity allows a highly precise block machining of a huge range of parts dimensions, and in order to accelerate the delivery, the parallel machining of identical parts on different machines.

Maplan produces components for a multitude of demanding application sectors, e.g. plastics industry, power stations building, aviation, wind power, ship building, presses, machine cases, tooling machines and general mechanical engineering.

Dimensions : max. length 10.000mm x width 3.200mm x high 2.500mm
Max. weight 50.000kg

Machine parc :
CNC controlled portal machining centers
CNC controlled milling and boring centers
CNC controlled vertical lathe
Flat grinding
3D measuring device
2D/3D construction and programming system
EXAPT plus

The manufacturing

„ best of Metal “
